Quick Start Guide

TVGeek Media Center is our version of Kodi. You will be able to watch movies, TV Shows and Live TV from the application. In order to open the app, just press the Home button your remote and select TVGeek Media Center from Your Apps & Channels list

Important: There are more than one way to watch movies and shows from our software. The main method is to use the **Movies** and **TV Shows** sections but if there are no streams or only a few links to choose from you can try the **Home** section and open the other popular add-ons such as **Exodus Redux** etc. to search for more. We will try our best to use the best add-on for the main sections so you don't have to search.

How to install TVGeek Media Center for Fire TV

1. **Turn On Option for Apps from Unknown Source**
   a. From the Fire TV home screen, scroll to **Settings**.
   b. Next, scroll to the right and select **Device**.
   c. Next, scroll down and select **Developer options**.
   d. Then select **Apps from Unknown Source** to turn the option to **ON.**
2. **Download TVGeek Media Center App**
   a. From the Fire TV home screen, scroll to left to search for app.
   b. Search for the **Downloader** app.
   c. Install and Open **Downloader.**
   d. Enter the **TVGeek Media Center** URL – http://bit.ly/2AQntLO (case-sensitive)
   e. Install **TVGeek Media Center.**
3. **Install custom build to TVGeek Media Center**
   a. From the Fire TV home screen, open **TVGeek Media Center** from **Your Apps & Channels**.
   b. Scroll to the right and select **Programs**.
   c. Next, scroll down and select **Program add-ons**.
   d. Next, scroll down and select **TVGeek License**.
   e. When prompt, enter the **License Key** and select **Done**.
   f. Select **Builds** > **TVGeek Builds.**
   g. Next, select the **TVGeek Aeon Nox**.
   h. Wait for build to download and install. This process takes around 3-5 minutes.
   i. After the build is done installing, re-open the TVGeek Media Center app.
   j. Since this is the first time, it will take a few minutes to complete.
   k. After allowing the system to update for a few minutes, you are ready to watch movies and TV show.

Note: Uninstall any previous version of Kodi/TVGeek Media Center.

How to watch a movie
1. Open **TVGeek Media Center.**
2. Navigate to Movies and select Movies for Trending movies or any subcategory under Movies.
3. Browse the list of movies and select a movie to watch.
4. Wait for system to get list of video links from the video providers.
5. Select a link to start streaming the movie.

Tip: If the selected link does not work or if it buffers then try to select another link. Links are free to everyone and maybe congested during high traffic hours.

There are links that require pairing such as Open Load. Just follow the instructions from on-screen prompt to pair successfully. Once paired you are good for 4 hours. These links are a hassle to pair but are more reliable since they have less traffic.

If there are no links available such as some movies in theater then just try again at a later time.

How to watch a TV Show
1. Open **TVGeek Media Center.**
2. Navigate to TV Shows and select TV Shows for Trending shows or any subcategory under TV Shows.
3. Browse the list of TV Shows and select a TV Show to watch.
4. Select the season.
5. Select the episode.
6. Wait for system to get list of video links from the video providers.
7. Select a link to start streaming the show.

Tip: If the selected link does not work or if it buffers then try to select another link. Links are free to everyone and maybe congested during high traffic hours.

There are links that require pairing such as Open Load. Just follow the instructions from on-screen prompt to pair successfully. Once paired you are good for 4 hours. These links are a hassle to pair but are more reliable since they have less traffic.

If there are no links available such as some shows that are aired the same day then just try again at a later time.

Premium Tip: Do want more reliable high quality links? Check out our video for Real-Debrid? Real-Debrid is an unrestricted downloading service which will alleviate buffering for most Kodi add-ons that serve on-demand content such as movies and TV shows. Real-Debrid is a premium service costing $20 for 6 months. It is almost secure so you do not need purchase a VPN service since the streams are encrypted.

How to set up Real Debrid

How to pair your Amazon Fire TV Remote
1. To turn on your Fire TV, unplug and plug back in your device.
2. When you see the Fire TV logo flashing, press and hold down the **Home** button on your remote for up to 20 seconds.
3. A message will prompt in the bottom right corner of the screen acknowledging the pairing is complete.
4. The process takes a minute so if it does not pair, press and hold the Home button again for up to 20 seconds.

Tip: The pairing process works best with a fresh pair of AAA batteries.

Why buy from us?

Our media center automatically updates remotely through our cloud server. If a popular add-on goes down then we would replace it behind the scene so that your system will always be running as smoothly as possible. Most other builds do not have this level of programming and maintenance so their buyers end up with a useless Fire TV after a few months. We have programmed and sold thousands of Fire TV devices loaded with TVGeek Media Center and our customers love our system. We have received positive overall reviews from all of our customers. Read our feedbacks to see how our customers rate our boxes and service. You will not be disappointed with our expertise and custom programming.
